

**Amendments to the Drawings:**

The attached sheets of drawings include changes to Fig. 1 and Fig. 3. These sheets replace the original sheets for Fig. 1 and Fig. 3. The following changes were made to the figures:

Fig. 1 has been amended such that reference number 150 only designates the Friendly text abstract layer.

Fig. 3 was amended to include reference number 300.

**Remarks/Arguments**

This document is being submitted with replacement sheets of drawings. The changes to the drawings were referred to in the Amendment filed on August 6, 2007. As indicated in the Amendment of August 6, 2007, the drawings were amended as follows:

**Objection to the Drawings**

The drawings were objected to for failing to comply with 37 C.F.R. 1.84(p)(4). Specifically, the reference character 150 was used to designate both software in Figure 1 and the Friendly text abstract layer in Figure 1. Figure 1 has been amended such that reference number 150 only designates the Friendly text abstract layer. A replacement sheet for Figure 1 is included with this amendment. In light of this amendment, this objection is now moot.

Additionally, as noted above, Figure 3 was amended to include reference number 300 in response to the Office Action's objection to the specification for including a reference number that was not in the drawings. A replacement sheet for Figure 3 is included with this amendment. Applicants thank the examiner for pointing this out.

**Conclusion**

This Amendment supplements the response to the Office Action mailed on April 4, 2007. Still, that Office Action may contain arguments and rejections that are not directly addressed by this Amendment due to the fact that they are rendered moot in light of the preceding arguments in favor of patentability. Hence, failure of this Amendment to directly address an argument raised in the Office Action should not be taken as an indication that the Applicant believes the argument has merit. Furthermore, the claims of the present application may include other elements, not discussed in this Amendment, which are not shown, taught, or otherwise suggested by the art of record. Accordingly, the preceding arguments in favor of patentability are advanced without prejudice to other bases of patentability.

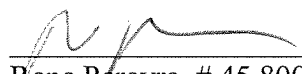

It is believed that no fees are due with this filing. However, the Commissioner is hereby authorized to charge any deficiencies or credit any overpayment with respect to this patent application to deposit account number 13-2725.

In light of the above remarks and amendments, it is believed that the application is now in condition for allowance and such action is respectfully requested. Should any additional issues need to be resolved, the Examiner is requested to telephone the undersigned to attempt to resolve those issues.

Respectfully submitted,

Dated: August 28, 2007
